10:16am

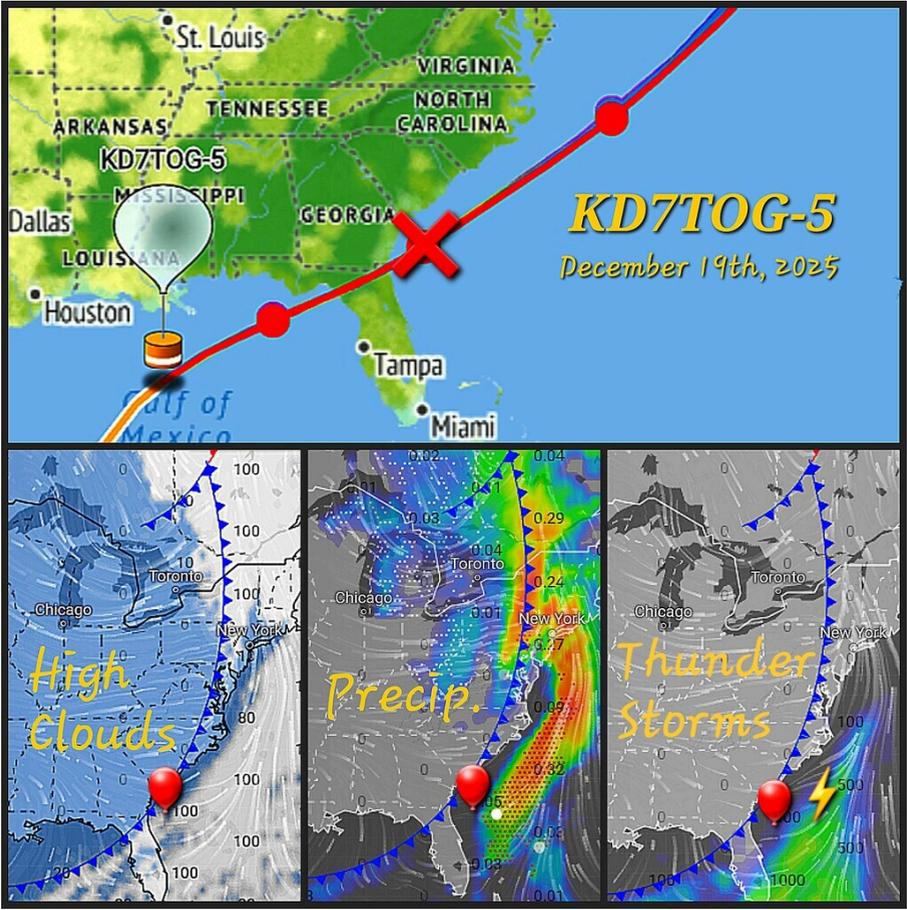

On December 19th, a line of devastation appears to have taken out 3 pico-balloons... bad timing for all...

- SP2ROC-7 - 46,000'
- KC3LBR-485 - 42,000'
- KD7TOG-5 - 40,000'

From the viewpoint of KD7TOG-5, this is what we all attempted to fly through...

So ... build them strong, fly them high, and offer them up to the random forces of nature !!

We'll be back !

Tony - KD7TOG
