DNF: Did Not Finish - Found less than 3 Transmitters

#-XMTR: Number of Transmitters found out of 4

Transmitter hiding places shown below.

The November T-Hunt will be held at Whitney Mesa Park on Saturday, November 15, 2025 at 8:30 am with doughnuts, coffee, water, conversation and equipment preparation. The actual T-Hunt will start at 9 am and the participants will be tasked with finding three (3) transmitters. The photo below shows the meeting/starting point for the T-Hunt. The weather outlook for Saturday looks wet, so bring your raincoat! The transmitter frequencies for the hunt will be: T1 – 146.575, T2 – 146.585 and T3 – 146.595 MHz . You may want/need to use NBFM on your HT to prevent possible interference on adjacent frequencies during the T-Hunt.
