

ALP40-J was launched May 12, 2026, from the Boulder City Dry Lakebed at 0748 am PDT by Tom, KB7HTA. The balloon can be tracked at [WSPRTV](#). It is transmitting WSPR telemetry on 20m and transmitting CW on 28.022 MHz. If you do a search on the Reverse Beacon Network for KB7HTA, you will see the stations receiving the balloon's CW signal. Even though the launch was successful and it is aloft, there is a problem with transmissions due to an unknown problem. See the Flight Information link.
