Launch Information

ALP40-K was launched this morning, November 11, 2026, from Boulder City Dry Lakebed at 0749 PST. The skies were clear with calm winds, which was evident by the balloon going almost straight up. It initially climbed at a rate of about 8,000' an hour and reached a float altitude of 39,000’ +/-.

It is transmitting WSPR telemetry on 20m and transmitting CW on 28.022 MHz If you do a search on the Reverse Beacon Network for KB7HTA, you will see the stations receiving the balloon’s CW signal.
